UX, ideation and workflows

Low to High Fidelity Design

User Interface Design

Front end development

Basic knowledge in PHP

Branding Design

Ad Design

Digital ArtWorks

2D Animation

After Effect Animation

## INTERESTS

Photography

Writing

Art works

Animation

Cricket

Volleyball

Table Tennis

Shuttle

Chess

Carom Board

## PROFILE

I have 14+ years of experience in web development technologies. I have been working regularly on Wireframe, prototypes, Websites and Web & Mobile Apps design materials and conversion the design to HTML along the CSS and JS. The last one year I have been working on the React technology. I have created some experimental works using React for training purpose. I have also mentioned those links in my resume.

I can handle design tools like Photoshop, Illustrator, Adobe XD, and Figma very well. I have a solid grasp of user-centered design (UCD), and looking for the opportunity to dig deep in it. I am Able to play a key role throughout the project development to ensure maximum accessibility, customer experience and usability.

I would like to contribute fully in projects from design to front end development. I can also do logo designs, business card designs and ad designs using illustrator and Photoshop.

I am interested in animation works too. I have experience in animations. In my last winning contest I have created svg animation for that project using Adobe Flash.

In addition to all of the above, I do artwork also. I can do acrylic, water color, soft pastel and oil pastel paintings. I do pencil sketch too. I have a portfolio for my digital paintings and vector art works. Seeking to build my knowledge and skills more and contribute as UI and Front End developer.

**Yours Faithfully**

(KARTHIKEYAN M)
